

Information about the Academic University

St. Petersburg academic University, scientific-educational center of nanotechnology RAS the Academic University was established as a scientific-educational centre Fiziko-technical Institute. A. F. Ioffe Russian Academy of Sciences in 1997 for integration of science and education in the field of physics and information technology. The initiative of his organization belonged to the Director FTI im. A. F. Ioffe, RAS Vice-President of RAS academician Z. I. Alferov which is headed by him since the creation to the present time and is now the rector of the Academic University. Achievements of the University Integration is the key element of modern science and education. While establishing the St. Petersburg Academy of Sciences by Peter the great was expressed for the idea of the triune composition of the Academy of Sciences, Academic University and Academic Gymnasium. Three centuries later in St. Petersburg managed to realize this idea in Academic University combining research laboratory of a University Department and Lyceum Physico-technical school. Training of students and graduate students directly in contact with actively working scientists in the classroom in lectures, seminars and laboratories. It meets the advanced world tendencies of training in the field of nanotechnology and creates the necessary preconditions for the preservation of leading positions of Russia in scientific and technical progress of the XXI century. The system of training of scientific personnel planned by academician A. F. Ioffe has been continuously improved and developed after the creation of the Saint Peterburgskogo academic University acquired complete. On the territory of our University is Academic preparation of students of physical-technical faculty of St. Petersburg state Polytechnic University continues the tradition of physico-mechanical faculty which was founded in 1919 by A. F. Ioffe. The Academic University is equipped to conduct training sessions and scientific conferences of various scale. The University has extensive halls, conference and theatre halls and a hotel. For active leisure available to students and employees of a sports complex including a swimming pool a hall for team sports indoor tennis court and a gym. In the Academic University was held more than 100 conferences in various fields of science. Among them Russian-French seminar on nanotechnologies St. Petersburg international workshop on nanobiotechnologies international conference on Amorphous and microcrystalline semiconductors, all-Russian conference Nitrides
